

## Dwellings Darnitsa

Location: Darnitskii boulevard, 7, Kiev, Ukraine.

A 12-storey semicircular panel building, completed in 1974. Such buildings are included in a series of typical mass development of the left bank of Kiev and mass development in Soviet Union in general. The series 1-464 designed as a 4, 5 and 9-storey housing, so this building is considered as high-rise. All series of mass post-war buildings were designed to place as much people as possible. There were enormous strict rules, limitations and norms, that forbade any demonstration of creativity, individuality and style of the buildings. All districts, sections, streets, yards and apartments had to be identical. They had no comfortable life-conditions.
